

## Quality, Environment and Safety Policy

The integrated management policy aims to make our company a reference supplier in the iron and steel foundry sector.

**We are committed to guiding our activities by the following principles:**

### **Customer Satisfaction**

We produce so that our product meets and exceeds our customers requirements, and we systematically match our offer to market requirements;

### **Quality**

We continuously monitor our production process to ensure the quality of the final product. We ensure the design, manufacture and supply of top level products;

### **Environmental Responsibility**

The life cycle of our product ends with its possible recovery, we comply with current legislation, we work to reduce emissions, reduce waste produced and prevent pollution. We interact with the surrounding environment and other relevant stakeholders by communicating our integrated management policy;

### **Resources**

We seek environmentally friendly technology solutions, encourage the development of our human resource competencies, ensure working conditions that preserve the safety of our employees in compliance with legal and other requirements;

### **Active safety**

We provide safe and healthy working conditions to prevent injuries and health problems to people; We implement methods to eliminate hazards and reduce risks, we are committed to consulting and involving employees and promoting continuous improvement;

The QAS policy is managed objectively, simply and effectively. We measure the performance and satisfaction of all relevant stakeholders, including customers, suppliers, employees, management, regulatory authorities, and the surrounding environment.

We aim, through the involvement of all team members, to identify the risks inherent in our system, implement actions, monitor objectives, and achieve good results.
