Integrated Management System

Sistema de Gestão Integrado

Quality, Environment and Safety Policy

At FAL, we commit to being a reference in the steel and iron foundry sector, promoting the continuous improvement of our Integrated Management System.

We commit to guiding our actions according to the following principles:

Customer satisfaction: produce to meet, and whenever possible exceed, our customers' expectations, and adapt our offer to market demands;

Quality: control and monitor the production process, to ensure product quality from design to delivery;

Environmental responsibility: comply with current legislation, reduce emissions and waste, prevent pollution, and promote the valorization of the product at the end of its life cycle. Maintain a close relationship with the surrounding environment and stakeholders;

Resources: ensure sustainable technological solutions, promote the development of skills, and guarantee safe working conditions in compliance with legal and regulatory requirements;

Active safety: ensure safe and healthy working conditions, prevent injuries and health problems, eliminate hazards, reduce risks, and promote workers' participation in continuous improvement;

Performance: evaluate production performance and stakeholders' satisfaction, promote employee involvement and teamwork to identify risks, implement actions, monitor objectives, and achieve sustainable results.
